

NPSC Science Workshop

National Progressive Schools' Conference (NPSC), played host to Dr. Ken Silburn, an

internationally renowned science educator based in Sydney, Australia. Dr. Silburn is the head teacher science at Casual high school in Sydney Australia and is the recipient of the Prime- Minister's Science Prize for excellence in Secondary Science teaching, 2015.

Dr. Silburn conducted a workshop for 100 Science teachers from NPSC Schools in the premises of Ahlcon International School. The workshop was organized by National Progressive School's Conference (NPSC) and Australian High Commission, Department of Education and Training.

Dr. Amanda Day, Counsellor (Education) and Mr. Ben S. Kelly First Secretary (Education) Australian High Commission graced the Occasion.

Several engaging activities and experiments were carried out in the workshop by Dr. Silburn to reinforce the concepts of visual stimuli, sound and air pressure. Participants actively took part in all the activities and appreciated his hands-on experiments which were fun-filled and laced with elements of surprise.

NPSC Chairman and principal host school Mr. Ashok Pandey emphasized upon the fundamental principle of science education as "science by doing approach".
