National Progressive Schools' Conference, played host to Dr. Ken Silburn, Head Science Teacher at Casula High School, Sydney, Australia. Dr. Silburn conducted a session on 'science by doing' for science teachers from NPSC Schools. The session was organised by National Progressive School's Conference (NPSC) in association with the Australian High Commission, Department of Education and Training. The event was graced by the presence of Dr. Amanda Day, Counsellor (Education, Ben S. Kelly, First Secretary (Education) Australian High Commission and NPSC Chairman, Ashok Kumar Pandey. During the session, Dr. Silburn explained the concept of sound through a simple experiment using a common straw which proved that when vibration travels through air, the sound is emitted. During the event, NPSC Chairman, Ashok Kumar Pandey also emphasized upon the value of science education by applying 'science by doing approach'.
